

Live Gaming

Live Gaming

A Cross-chain Entertainment Live
Streaming Platform

white paperV1.0

2018 saw the surge of DAPPs on public blockchains, which still continues. Gambling games take the largest share. However, due to the monotonous gaming form as well as a large proportion of repetitive products, the target customers are limited, from October 2018 to date, the first-tier group gradually emerges and goes further and further ahead of the others. This is a trend that becomes clearer as the DAPP ecology gradually matures.

Therefore, the key strategy for DAPP's future development would be to diversify functional innovation and product forms, while expanding target groups.

LiveGaming is the very first entertaining livestream platform based upon cross-chain technology, where streamers interact with players through live video streaming. Players get to enjoy highly immersive entertaining experience based on a rich variety of gaming forms.

LiveGaming include Gambling games, casual games and board games. To facilitate DAPP' s ecodevelopment, our platform is dedicated to combining more gaming forms with Blockchain technology.

LiveGaming adopts new cross-chain technologies which support three public blockchains: Ethereum, EOS and TRON. The issued LGT tokens can freely circulate on three public blockchains, making cross-chain mining, cross-chain exchange and cross-chain dividend come true.

Streamers Introduction

LiveGaming (also referred to as “the Platform”) streamers come from Europe, Americas, Asia and other parts of the world and are managed together by a professional agent. Most of them have relevant experiences as off-line gaming dealers and with video content self-media. Out-going and easy-going by themselves, they receive a pre-job training provided by the Platform to make sure they work in a professional way the Platform demands.

The Platform establishes a multi-channel commission mechanism for the streamers to earn more on the platform and also for other streamers to join hands.

Gambling Games

The Platform will first open Dice and Baccarat for the players to choose and bet, players can interact with streamers while gaming. Sicbo, Roulette, Texas Hold'em Poker and Slots, and others will soon come.

Casual games

LiveGaming will launch a variety of casual games including Minesweeper, Fruit Ninja, block-elimination games, Gold Miner and so on, in order to perfectly combine Blockchain technology and traditional casual games.

Board games

LiveGaming will soon release a board-game section, a brand-new live streaming entertainment. It will include world's mainstream board games like Werewolves, BANG!, The Resistance, Elveon and Halli Galli, providing diverse experiences for our users.

Players End

Play the games of Dice, Baccarat, Werewolves and others; Live streaming.

Hosts End

Control the process of games; receive gifts and money; own a commission wallet.

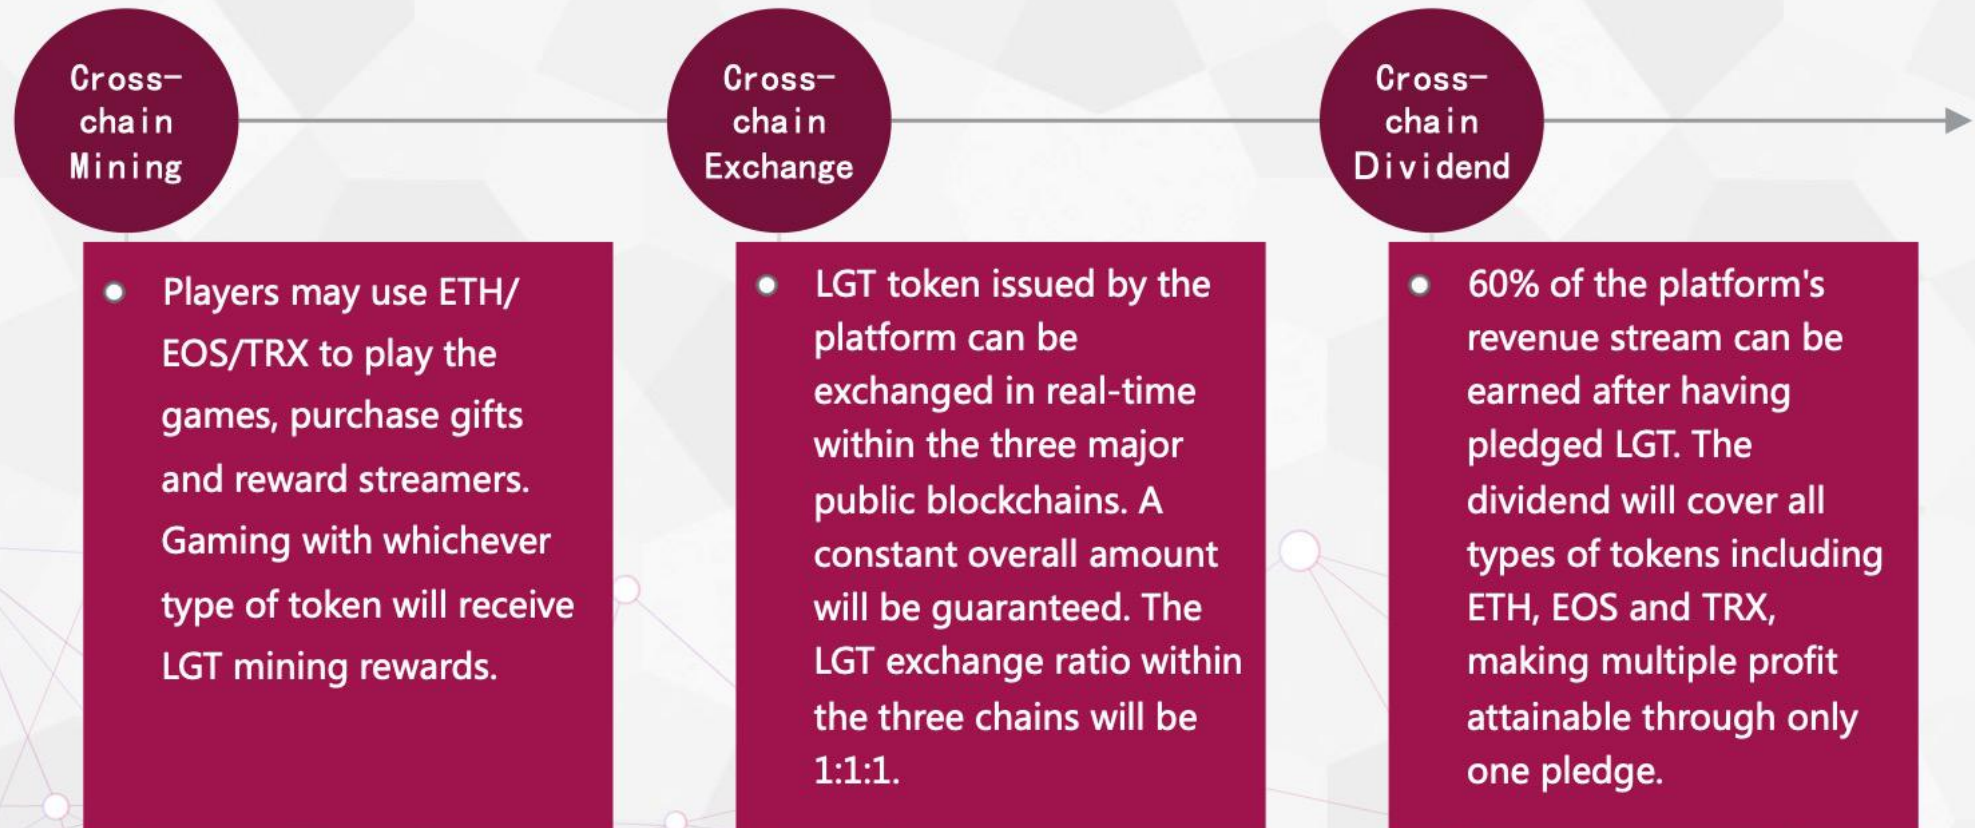

Interactions

Make real-time communication; use the Platform' s exclusive stickers; purchase and send gifts; reward with digital currencies; join activities and take assignments; join Luck Lottery and Hongbao Rain.

Other functions

Take pledge dividends; make invitation rebates.

LiveGaming becomes the real cross-chain platform by adopting cross-chain technologies to successfully support Ethereum, EOS and TRON. The characteristics of LiveGaming are as follows:

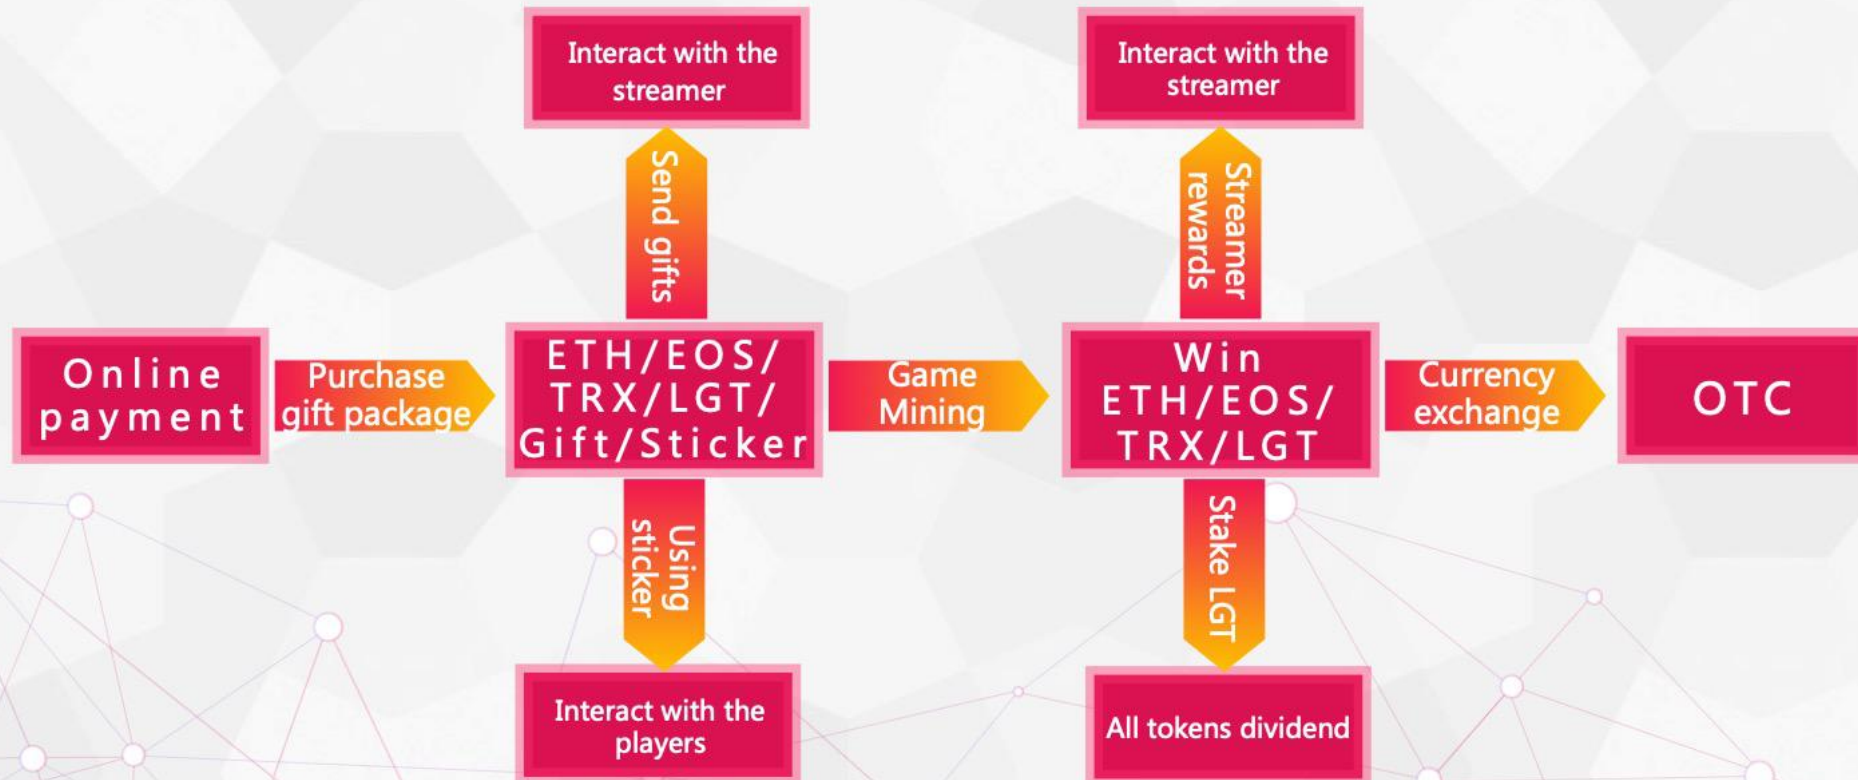

LiveGaming will adopt a rebate mechanism based on hierarchical invitation. When inviting a friend to join the platform, each player can obtain extra rewards of which the ratio is decided according to the friend's level. A maximum of the rewards of altogether three levels can be obtained, meaning that 0.35% of your friend's bet will be returned to you, no matter the game is lost or won.

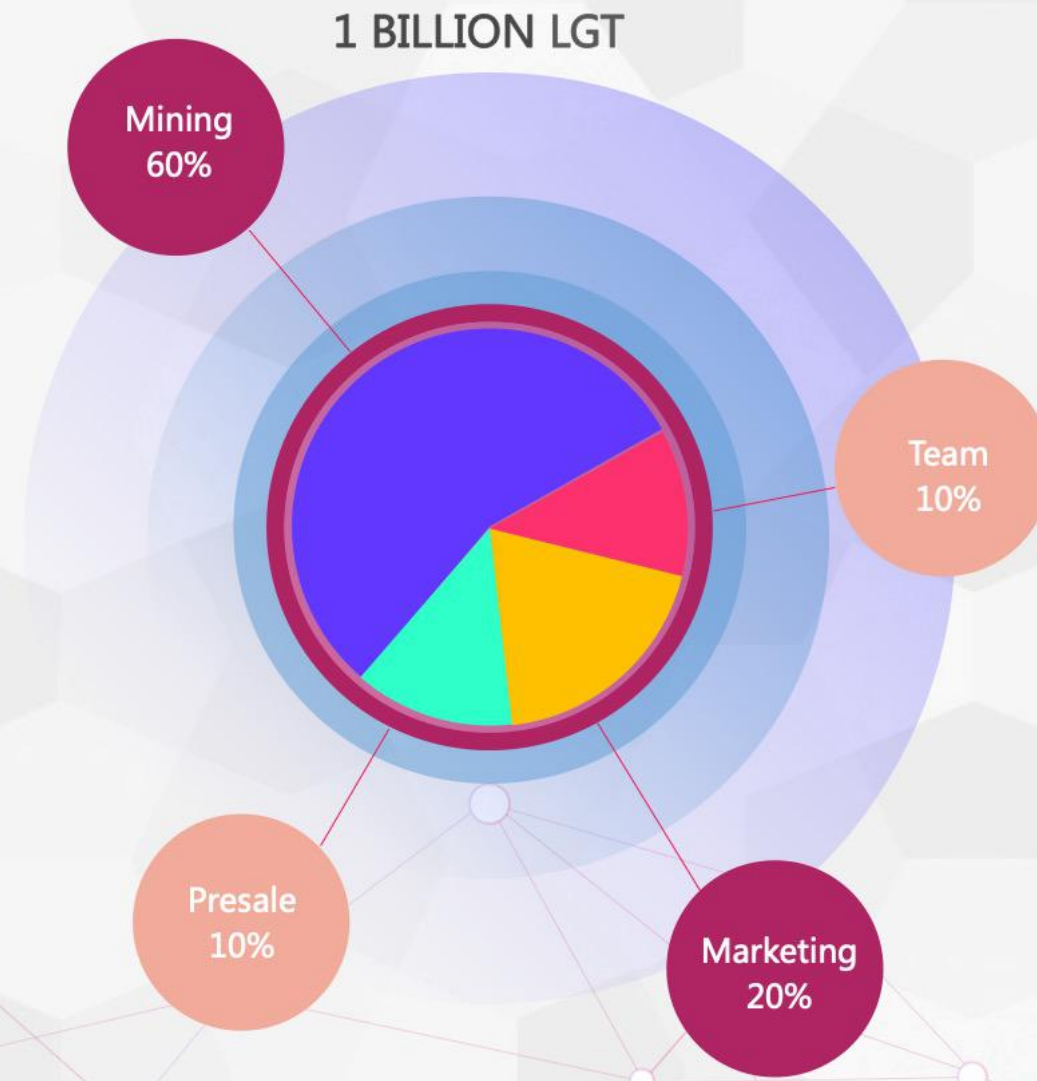

The ratio is as below:

Invitation reward				
reward	level 1	level 2	level 3	total
proportion	0.2%	0.1%	0.05%	0.35%

After LiveGaming goes online, players will be able to purchase in-game packages through online payment methods (PayPal) to participate in the game. In-game packages include an equal amount of digital currency and items.

LGT will be issued accross three public blockchains: Ethereum, EOS and TRON. The total amount is 1 billion and will not be extended. Cross-chain 1:1 exchange in real-time is achievable. Distribution solution is as such:

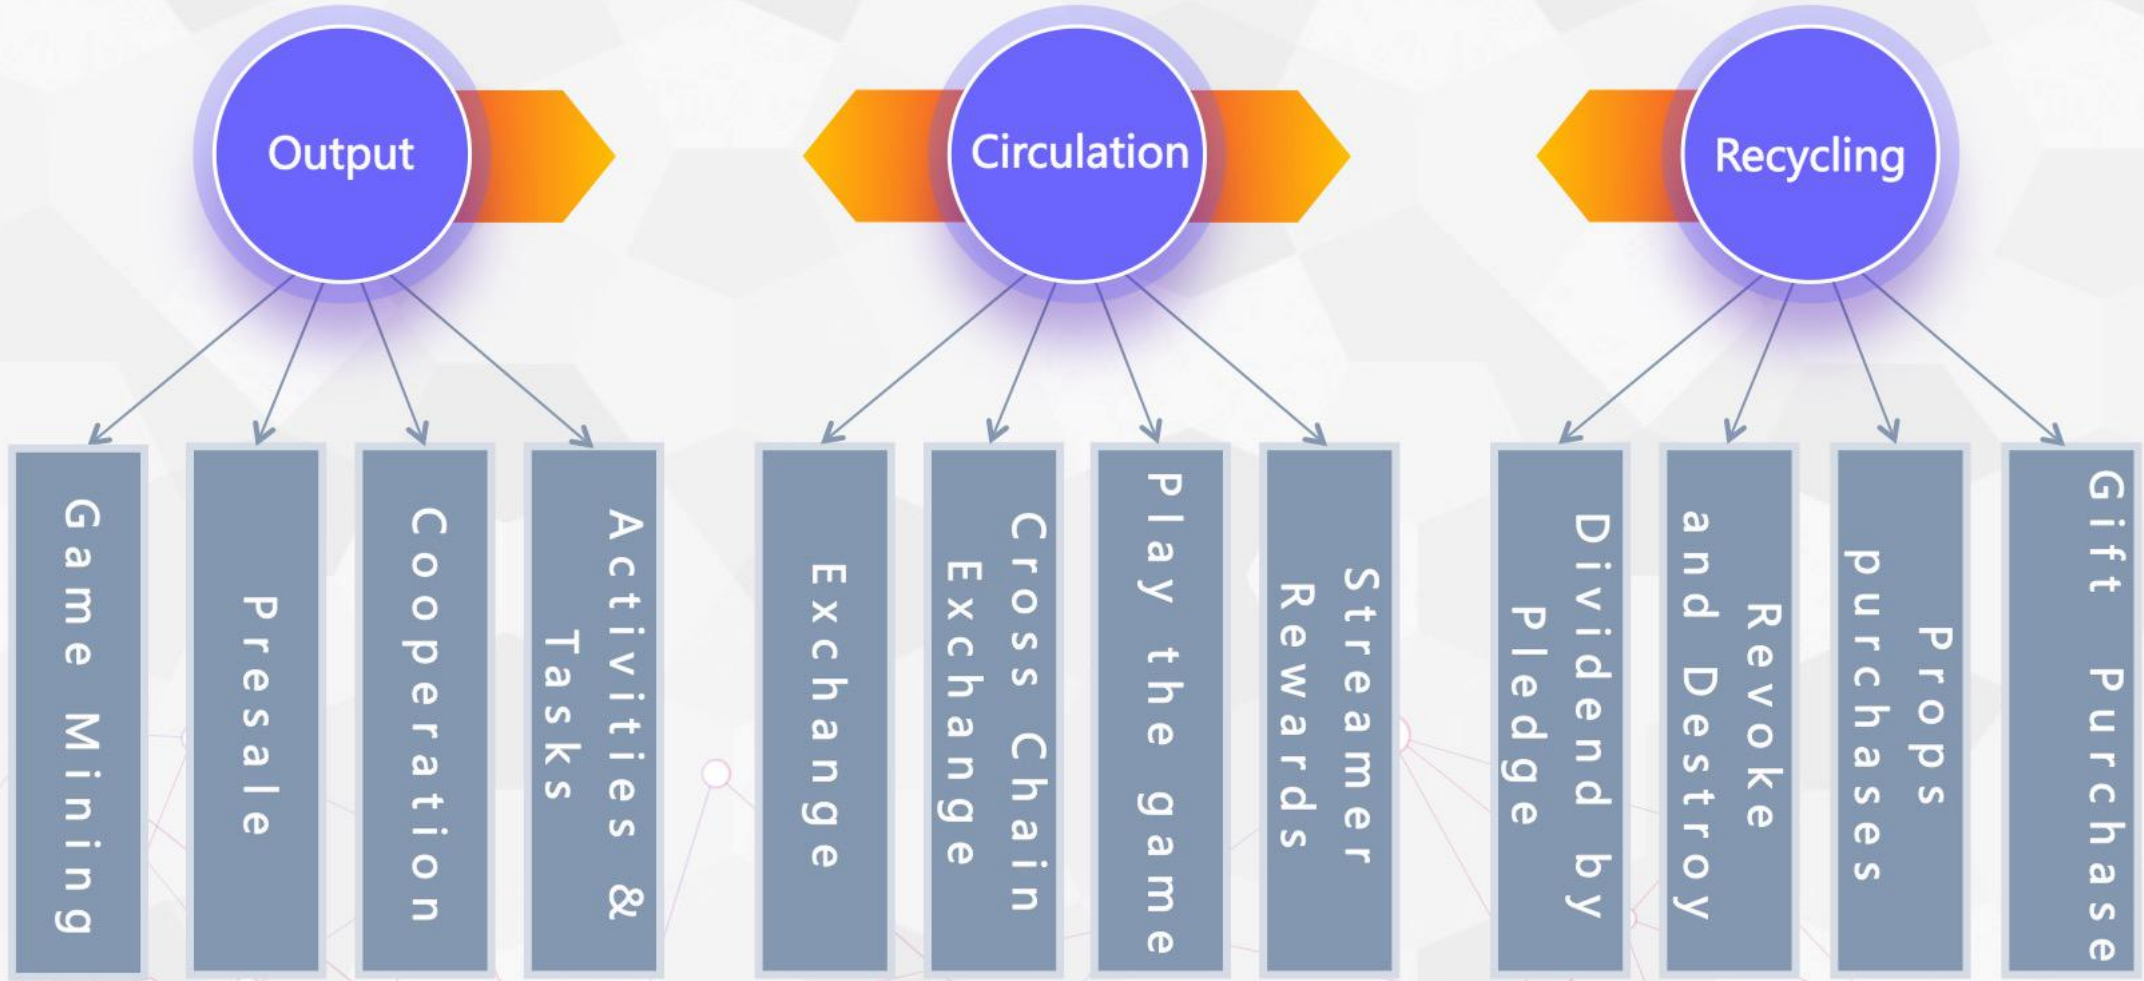

There are ten major stages in mining, and each stage can be divided into ten minor stages. Each minor stage takes six million LGT. Concrete parameters are seen in the chart below:

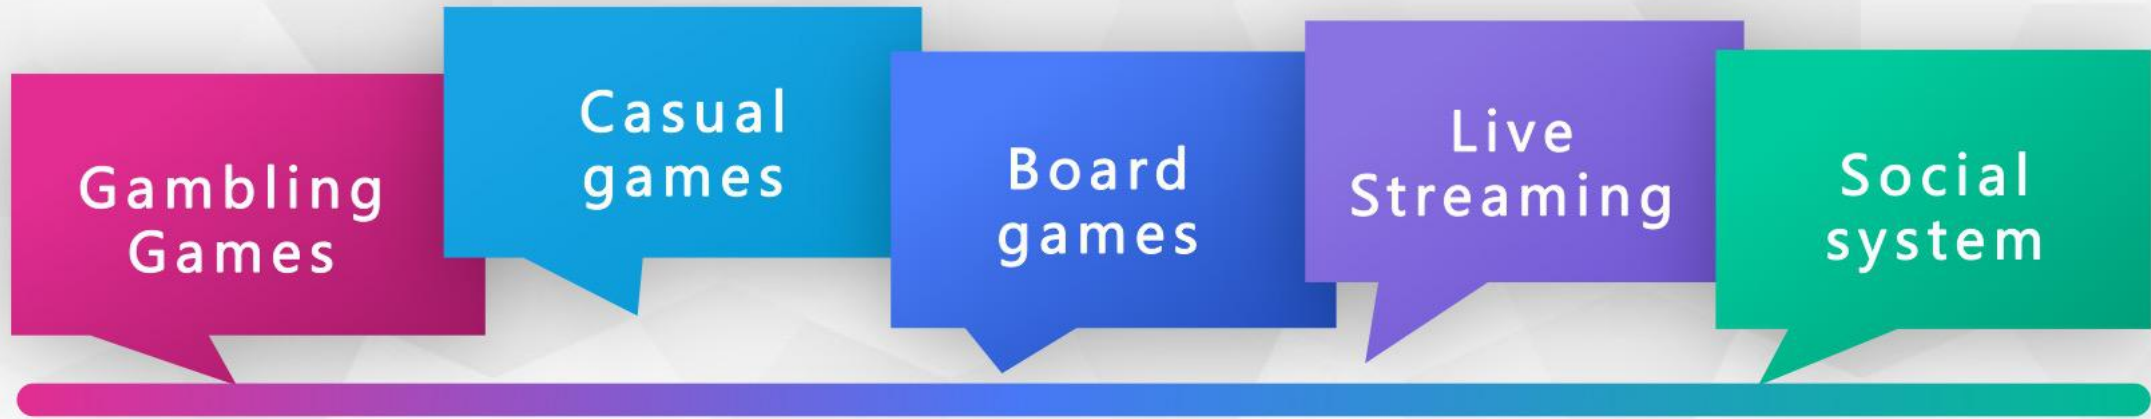

Mining stage 1			Mining stage 2			Mining stage 3			Mining stage 4			Mining stage 5		
Stage	Bet(USD)	Receive(LGT)	Stage	Bet(USD)	Receive(LGT)	Stage	Bet(USD)	Receive(LGT)	Stage	Bet(USD)	Receive(LGT)	Stage	Bet(USD)	Receive(LGT)
1.1	0.260	1	2.1	0.480	1	3.1	0.920	1	4.1	1.580	1	5.1	2.680	1
